

OLABANJI ANDREW OKULENU

City: Surulere, Lagos, Nigeria

Email: wilsonbanji@yahoo.com Phone no: +2349013786390 LinkedIn: www.linkedin.com/banjiwilson

Website: <https://main--updatestreet.netlify.app/> GitHub: www.github.com/teflonRozay

Objective:

Seeking a position as a Frontend Developer where I can utilize my skills in HTML, CSS, JavaScript, and React to contribute to innovative web development projects.

Education:

Bachelor of Science in Physics

University of Lagos

Graduated: March, 2016

Web Development Certification

FreeCodeCamp, Khan Academy, The App Brewery (Angela Yu's Udemey Course)

2021 – 2023

Skills:

- Proficient in HTML5, CSS, Bootstrap, and JavaScript
 - Experience with modern frontend frameworks such as React.js
 - Strong understanding of responsive web design principles
 - Familiarity with version control systems like Git and GitHub
 - Knowledge of UI/UX design principles and best practices
 - Knowledge of Tailwind CSS for utility-first styling
 - Knowledge of Redux for state management
-

Projects:

Google Clone Website

- Developed a clone of the Google search engine using React Js
- Implemented search functionality, autocomplete suggestions, and responsive design

Food Recipe Website

- Created a website to browse and search for food recipes using React Js
- Integrated external API to fetch recipe data and display it dynamically
- Implemented features such as search, filter, and recipe details page

Weather Checking Website

- Developed a website to check the weather forecast using React Js, and an external weather API
- Implemented features to display current weather conditions, forecast for the upcoming days, and location-based weather search
- Designed a user-friendly interface with responsive layout

Facebook Clone Website

- Created a clone of the Facebook social networking platform using HTML, CSS, JavaScript
- It is a static Facebook page

Stridez Project

- Developed and maintained the Stridez project as a Frontend Developer at Skywater Energy
- Stridez is a social media e-learning website designed to facilitate learning and social interaction
- Collaborated with other developers to design and implement multiple pages, including the sign-up page, user profiles, and dashboard
- Ensured responsiveness across desktop, tablet, and mobile devices
- Utilized React.js, HTML, CSS, Bootstrap, and Tailwind CSS to create an intuitive and user-friendly interface
- Implemented state management using Redux to handle complex application states
- Developed features like user authentication, course enrollment, discussion forums, and real-time notifications
- Worked closely with UI/UX designers to ensure design consistency and alignment with user experience best practices
- Employed agile methodologies and participated in sprint planning, daily stand-ups, and code reviews

Experience:

Frontend Developer

Skiywater Energy, May 2024 – Present

- Worked on the Stridez project, a social media e-learning website, focusing on building responsive and user-friendly web pages
- Collaborated with cross-functional teams including UI/UX designers and backend developers to deliver high-quality features
- Utilized React.js, Tailwind CSS, and Redux to build scalable and maintainable code
- Participated in agile development processes, including sprint planning, daily stand-ups, and retrospective meetings
- Implemented best practices for code quality, performance optimization, and accessibility
- Conducted thorough testing and debugging to ensure a seamless user experience across different devices and browsers
- Utilized version control systems like Git and GitHub for project management and collaboration
